<p>Customer Service Center: 303-655-2017 or e-mail 1stop@brightonco.gov</p>	<p>Automated Inspection Line: 303-655-2151</p>

AFFIRMATION STATEMENTS:

Please verify that you have read and understand each statement by placing your initials in each corresponding box.

	It is my responsibility to ensure that the city's potable water supply is protected with a certified backflow device at all times under the use of this permit.
	The "Bill To" option is being offered above strictly for courtesy purposes. Full responsibility of monthly usage charges and final damage/loss charges will remain with the contractor of record for the permit. If the account is assessed with meter damage prior to or at final inspection, the contractor listed may be billed for actual time and materials for repairs and or replacement.
	A meter may be moved to new locations under the current permit; however, a site location map must be provided for each new location and the billing address must remain the same. The water shop will make every effort to move the meter to its new location within 24 hours of the request sans unforeseen circumstances. If a meter move is requested over the phone, a new site location map can be sent electronically and must be on file prior to the request being submitted.
	City of Brighton water may only be used on properties located within the current municipal boundaries. The use of hydrant water is permitted at the sole discretion of the City of Brighton and may be terminated at any time.
	No private meters are permitted on City of Brighton hydrants. No load counts will be permitted. No unauthorized relocation of the meter will be permitted. No hydrant water is allowed during the months of June-August for residential construction.
	Monthly service charges will be billed accordingly as outlined in the current fee resolution for bulk rates (current rate shown below.) The City reserves the right to shut off water service for unpaid balances on the monthly service bill. <i>Monthly service charge of \$139.50, plus \$8.10/thousand gallons</i>
	Any construction truck or other water carrying unit filling from this hydrant must carry and present a copy of this permit on demand. Any unauthorized use of hydrants in the City of Brighton – including unauthorized relocation of a permitted meter is punishable by law.
	City of Brighton personnel will initially set and lock the hydrant meter on the requested site. Any subsequent move of the meter will be requested through the Customer Service Center as directed above, and will be carried out by city personnel. When the need for hydrant waters is satisfied, a final inspection must be called by the contractor. The meter will be pulled, inspected, and final billing will be assessed. The \$1,000 hydrant meter deposit can be applied toward the final billing, and any outstanding balance on this deposit will be returned to the person/entity who supplied the deposit.
	Any correspondence for meter moves or final inspections must be made through a technician at the Customer Service Center. Reimbursements will be processed automatically by city staff approximately 60 days after meter return and final inspections. Final utility bill must be paid in full prior to reimbursement of deposits.

I have read and understand each statement as identified by my checkmarks above and by my signature affixed hereto:
